Professional Summary

Senior DevOps Engineer with 10+ years of experience designing, automating, and optimizing CI/CD pipelines, containerized platforms, and cloud infrastructure. Strong expertise in Jenkins, Azure DevOps, GitHub Actions, Bitbucket, Docker, Kubernetes (AKS), Helm, and Ansible. Proven track record in large-scale migrations, build performance optimization and cross-functional collaboration. Focused on ensuring high availability, scalability, and reliable deployments.

Key Achievements

- Reduced pull-request build time by 30% and daily build time by 1 hour through repository optimization.
- Automated on-prem to AVM migration tasks, reducing migration time significantly.
- Led migration from Azure DevOps to GitHub, including pipeline conversion to GitHub Actions.
- Implemented containerization strategy using Docker and AKS, improving deployment efficiency.

Core Skills

Category	Skills
Scripting	Python, Shell, Perl, Batch, Basics of C & Java
Version Control	Git (Bitbucket, Azure DevOps, GitHub), Subversion
CI/CD & Automation	Jenkins, Azure DevOps, GitHub Actions, Ansible
Containerization	Docker, Kubernetes, Helm
Testing Tools	SonarQube, WhiteSource, Checkmarx, Aquascan, CodeQL, Arnica
Platforms	Windows, Linux
Cloud Platforms	Microsoft Azure
Bug Tracking	Atlassian JIRA

Work Experience

Senior DevOps Engineer | Finastra Software Solutions, Bangalore, India | Jan 2023 – Present

- Integrated JUnit framework with DB testing and customized notifications.
- Optimized PR build process: reduced build time by 30% with parallel project compilation.
- Automated on-perm to AVM migration tasks using Ansible: WinRM enablement, Oracle setup, DB dump creation and restore, ODBC setup, Project setup etc.
- Developed CIT pipeline - includes patch deployment, DDL execution, DB backup, and test execution.
- Migrated Checkmarx to CodeQL for source code scanning.
- Created Docker images and published to ACR; managed AKS clusters and Helm charts, deployments and troubleshooting.
- Led migration from Azure DevOps to GitHub - repos and pipelines.

Senior DevOps Engineer | Makonis Software Solutions, Bangalore, India | Nov 2021 – Nov 2022

- Managed Azure DevOps repos, pipelines, and agent setup.
- Automated environment setup and deployments using Ansible.
- Developed scripts in Python, Shell, Batch to reduce manual effort.
- Worked with Docker basics and code analysis tools (Sonar, Whitesource, Aquascan).
- Familiar working in agile frameworks – Kanban and scrum.

DevOps Engineer | Finastra Software Solutions, Bangalore, India | Nov 2014 – Jul 2020

- Performed DevOps on Windows/Linux platforms using Jenkins.
- Managed Bitbucket repos, SonarQube admin tasks, and CI/CD pipelines.
- Automated deployments using Ansible and scripting (Perl, Shell).
- Created silent installer for LoanIQ using Python and IzPack.
- Reduced deployment time via Ansible integrated with Jenkins.
- Led migration from Bitbucket to Azure DevOps and Jenkins to Azure pipelines.
- Worked on containerization POC using Docker for microservices deployment.

Education

Bachelor of Engineering – Telecommunication, Dayananda Sagar College of Engineering (VTU), 2010 – 2014

Languages

English, Hindi, Kannada
